

There is nothing more important than the air we breathe.

2414 SERIES

OUR COIL CLEANING LINEUP BATHES THE SURFACE OF EVAPORATOR COILS CONTINUALLY WITH CLEANSING GERMICIDAL UVC LIGHT.

Magnet mounts on all models provide easy installation and will not damage the high efficiency air handlers or plenums. The Premium Model adds odor control benefits and also includes UVC Lamp that only needs to be changed every 2 years.

NOW WITH MAGNET MOUNTS

According to the Environmental Protection Agency (EPA), people spend approximately 90% of their time indoors and it has been found that indoor levels of pollutants may be between 50% and 99% higher than outdoor levels. Airborne problems contribute to allergies, asthma attacks, breathing difficulties, immune system failure, influenza, disease, sickness and even death.

SECOND WIND AIR PURIFIERS USE ULTRAVIOLET GERMICIDAL LIGHT AND A PATENTED PHOTO-CATALYTIC PROCESS TO DISINFECT MOLD, BACTERIA, INFECTIOUS DISEASE AND DECREASE VOLATILE ORGANIC COMPOUNDS IN YOUR INDOOR ENVIRONMENT.

IT'S A FANCY WAY OF SAYING THAT OUR PURIFIERS RETURN AIR AND COIL SURFACES TO THE WAY THEY SHOULD BE: CLEAN.

MODEL SF-2414

Our standard system used for coil and surrounding air disinfection. Optional odor control lamp available for advanced purification.

MODEL SF -2414-PREMIUM
